CS 40700: Final Project Presentation Grading Rubric

1 Version Control (1.0 point)

(a) All team members are required to consistently use version control system.

2 Presentation and Demo (7 points)

(a) Problem motivation: describe the problem you were trying to solve.
Project goals: briefly discuss the goals of your project.
Design outline: explain your design decisions and justify them quickly.

(b) Demonstrate all of the main functionality of your project.

(c) Ideally the introduction should not take longer than 3 minutes.

3 Implementation and Testing (10.5 points)

(a) Your implementation and demo should be based on the Sprint Planning Document. Please implement the tasks that you have planned in the document.

(b) Each team member must present and explain the tasks they have worked on during the sprint.

4 Overall Presentation (1.5 points)

(a) Organize your presentation intelligently, and speak loud and clear.

(b) Time yourself early on in your presentation preparation process.

(c) Do many dry-runs. (this is NOT OPTIONAL!)

Notes

(a) Each team is allocated 20 minutes. Practice your presentation thoroughly and make sure that it does not exceed your allocated time limit. Please have a copy of your sprint 3 plan during the review and demo the implemented user stories accordingly for Section 3.

(b) There is no dress code for the presentation but business casual would be a smart choice.

Total: 20 points (20% of your project grade)
