# CS 40700: Sprint Review Grading Rubric

## 1 Version Control (1.0 point)

(a) All team members are required to consistently use version control system.

## 2 Implementation and Testing (10.5 points)

(a) Your implementation and demo should be based on the Sprint Planning Document. Please implement the tasks that you have planned in the document.

(b) Each team member must present and explain the tasks they have worked on during the sprint.

## 3 Overall Presentation (1.5 points)

(a) Ensure to prepare your demo before the meeting and do a dry-run.

## Notes

(a) Please arrange to meet with your Project Coordinator on the suggested meeting day (usually Friday) or one day before it.

(b) Each team is allocated 15 minutes for Sprint 1 and Sprint 2 reviews. Practice your presentation thoroughly and make sure that it does not exceed your allocated time limit. Please have a copy of your sprint plan during the review and demo the implemented user stories accordingly.

(c) If you have some tasks based on machine learning or data mining algorithms, and cannot avoid certain error rates, it is understandable for your application not to always produce correct results. No points will be deducted for the tasks which work reasonably well.

## Total: 13 points (13% of your project grade)
